“Send voice clips by email”

This guide provides the steps required to install the application and the procedure to use “Send voice clips by email” with your BlackBerry from Vodafone handheld.

Installation

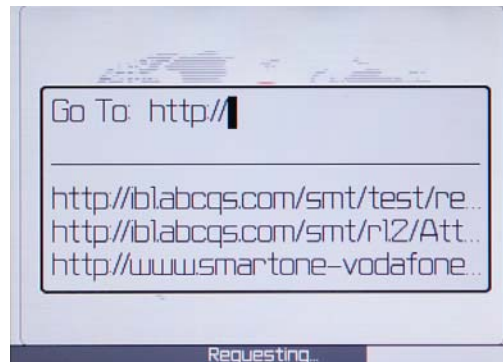

Please note if you have previously installed the “Voice Reply 1.0”, you must remove/uninstall it first. That software can be removed/uninstalled by the steps below:

- (i) Go to “Settings” and select “Applications” on your handheld
- (ii) Select “Voice Reply 1.0” and select “Delete”
- (iii) When the message “Delete “Voice Reply 1.0”?” appears, click “Delete”
- (iv) When the message “Deletion will occur when handheld is restarted. Restart now?” appears, click “Yes”

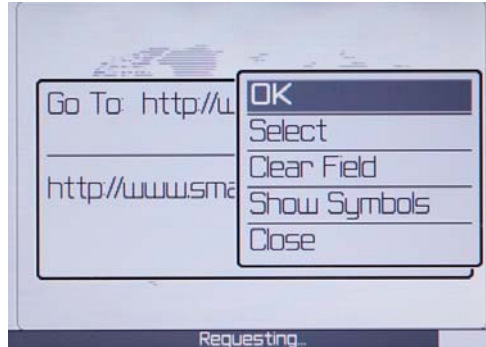

1. Select and click the WAP browser icon and then select **"Go To..."**

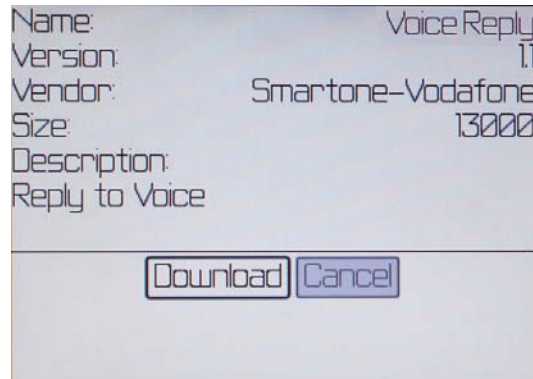

2. Enter the URL <http://www.smartone-vodafone.com/BlackBerry/Voice-Reply/reply2voice.jad>

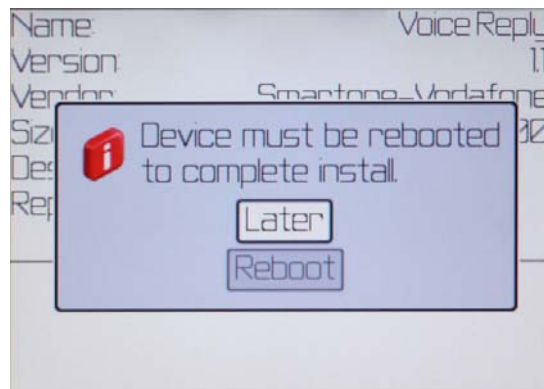

3. Click the trackwheel once then select **"OK"**

4. When the application download page appears, click the **"Download"** button. After the application has been downloaded, it will automatically install to your device *<please note, this step is for first time user only>*

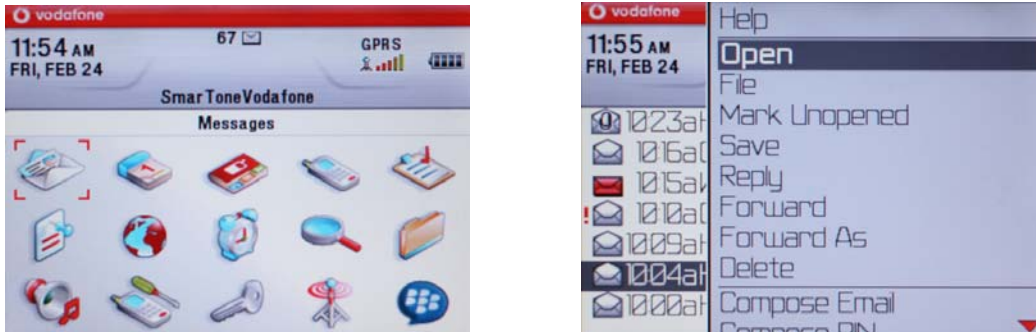

5. When the message **"Device must be rebooted to complete install"** appears, click **"Later"** to restart the device later or click **"Reboot"** to restart now

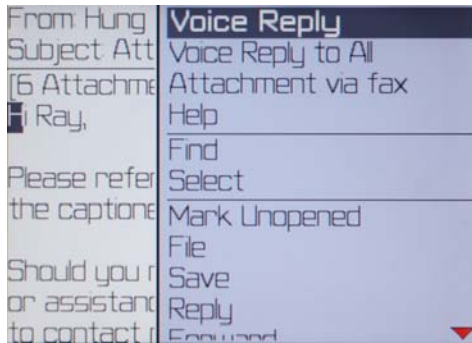

User guide

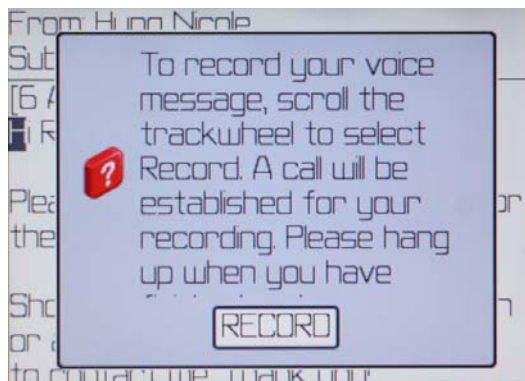

1. Go to Message and open the email to reply

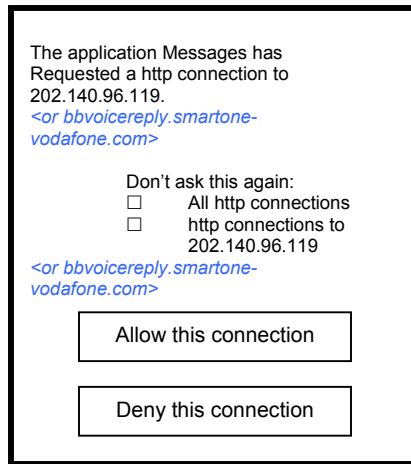

2. Click trackwheel once and select **"Voice Reply"** or **"Voice Reply to All"**

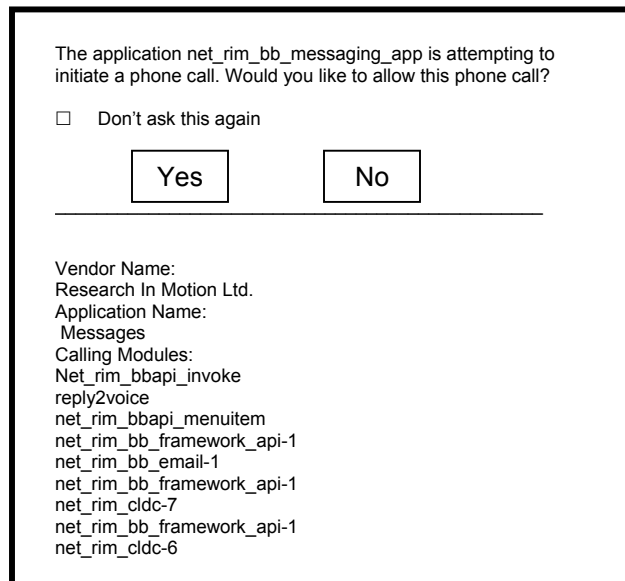

3. When the Voice Reply message box appears, click the trackwheel to record voice message. The device will automatically outdial a call for voice message recording

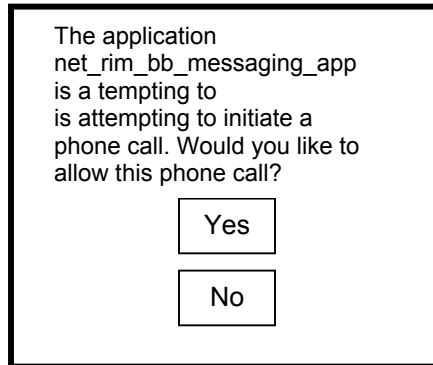

4. Check “http connections to 202.140.96.119” or “bbvoicereply.smartone-vodafone.com” checkbox and then click “Allow this connection”

5. (i) For BlackBerry 8700v™ from Vodafone, below message box will pop up to request a phone call, click “Yes” to allow the connection. You can check “Don't ask this again”.

(ii) For BlackBerry 7290™ from Vodafone and BlackBerry 7100v™ from Vodafone, below message box will pop up when using this feature. Please click “**Yes**” to continue

6. When the call is connected, you will be prompted to record the voice message that you would like to send to sender. After you have finished recording the voice message, just hang-up

7. Your voice message will then be sent to the sender as an email with a .wav Voice file attachment

Remark:

Please note that the maximum length of recording is 1 minute.
