Welcome

Welcome to the world of mobile communications! Once you have installed the 3G modem software - Vodafone Mobile Connect Lite, your BlackBerry® from Vodafone can easily work with your laptop as a 3G modem.

To do this, you need:

- A laptop running Microsoft® Windows® XP SP2
- Microsoft® Internet Explorer 6 or higher
- A USB cable
- BlackBerry® Desktop Software Installation CD

Vodafone Mobile Connect Lite software

Step 1 - Install BlackBerry® Desktop Manager 4.1.1 from the BlackBerry® Desktop Software Installation CD.

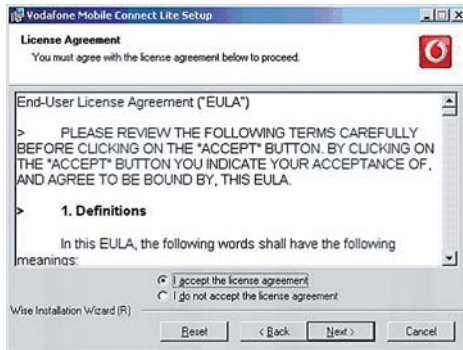

Step 2 - Install the 3G modem software - Vodafone Mobile Connect Lite

Download the software of Vodafone Mobile Connect Lite at smartone-vodafone.com/BlackBerry.

The installation Wizard will start. The entire process will take approximately 10 minutes to complete. Click the **"Next"** button to step through the Wizard; click **"Back"** to return to a previous step; click **"Cancel"** at anytime to abandon the installation.

You will need to accept the License Agreement and then follow the on-screen instructions to continue until the software installation is completed:

Step 3 - Connect your device

Connect the USB cable to the device and then plug it into any free USB port on your laptop. If this is the first time you have made a USB connection for this device, Windows® will automatically configure your device using the drivers provided by Vodafone Mobile Connect Lite, Windows® may display some information messages as this happens.

Step 4 - Start Vodafone Mobile Connect Lite

Once your device is connected, double-click the Vodafone Mobile Connect Lite icon to start software:

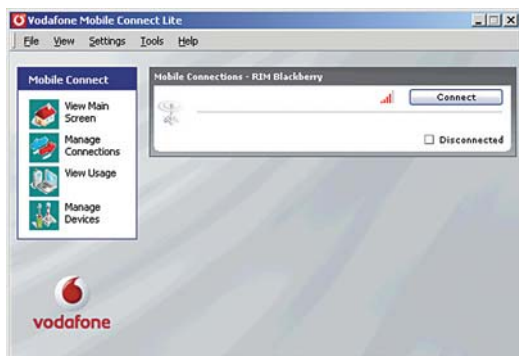

Step 5 - Get Connected

Vodafone Mobile Connect Lite will start and automatically connect to your device. To make a data connection, just click the **"Connect"** button:

Software overview

Now you can do all the following through one screen.

View Main Screen

Start a data connection via your connected device.

Manage Connections

Select whether Vodafone Mobile Connect Lite automatically connects to your device when it is plugged in, or whether you are prompted.

View Usage

Show your data usage for the current or previous month.

Manage Devices

Choose which device Vodafone Mobile Connect Lite should connect to, or to force the software to discover a new device when you have changed them.

To start the application

1. Connect your device

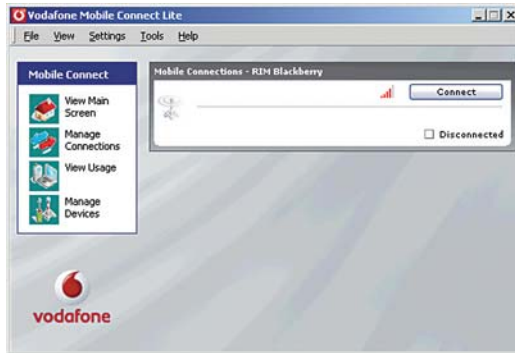

Before starting, connect your device to your laptop using its USB cable. Then run Vodafone Mobile Connect Lite. The following steps can set up the connection between your device and Vodafone Mobile Connect Lite.

The first time you connect your BlackBerry® 8707v™ from Vodafone, choose the “**Manage Devices**” option. This will show that the BlackBerry 8707v from Vodafone is connected to your laptop.

Click the “**OK**” button to continue.

Vodafone Mobile Connect Lite will now connect to your device and take you to the main screen. You will see that the **“Connect”** button is now enabled (ready for you to connect to the Internet through your device):

You will also see that the Vodafone system tray icon has a green tick through it to show that your device is connected:

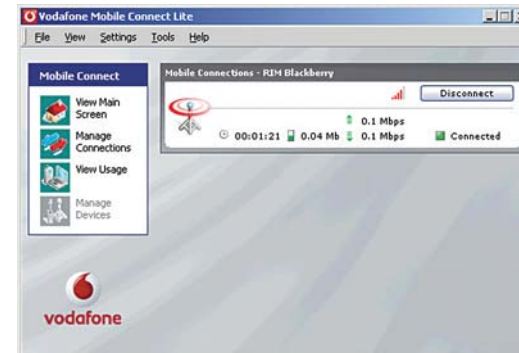

2. Make a Data Connection through your device

Once your device is connected to Vodafone Mobile Connect Lite, you can use it to set up a data connection.

From the main screen, click the **“Connect”** button. You will be prompted to select the APN, please select **“SmarTone (Hong Kong)”** then click **“OK”**.

Once connected, the main screen will change to show your connected status as well as current information. To break the connection, click **“Disconnect”**:

You can now use the data connection through your device, to access the Internet.

The system tray icon

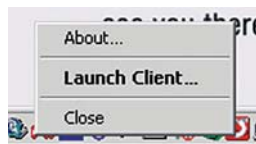

While Vodafone Mobile Connect Lite is running, a Vodafone system tray icon will appear in your system tray at the bottom right of your screen:

The icon will display useful messages when you are connecting your device and will also display any error messages if the software cannot connect to your device.

The icon will be present even when you close the main application.

If you place the mouse cursor over the icon and right click, you will see a menu as follow:

This menu allows you to start the main Connect client ("**Launch Client**"), read the "**About**" box or "**Close**" both the icon and the main application.

Hints and tips

If your device does not appear in the list of devices

As a first step, remove your device and cable from the laptop and restart your laptop. Re-attach your device and cable, then rerun Vodafone Mobile Connect Lite.

If you cannot make a data connection

Make sure that you are selecting the correct APN and that your SIM is enabled for data connections.

"Error: You must be on the Vodafone network to make a connection"

You can only use Vodafone Mobile Connect Lite with SmarTone-Vodafone. You may have attempted to make a connection using an unsupported SIM.

"The phone you have selected is an unsupported device"

If you see this error message when you try to connect to your device, it means you are trying to connect to a device not currently support by Vodafone Mobile Connect Lite. Because of the way the software is designed, it may well be that it will work successfully with your device. However if it doesn't, SmarTone-Vodafone will not be able to provide you with any support.
